SUMMARY

B.Tech CSE student (2027) passionate about coding and problem-solving, with full-stack MERN development experience and a solid foundation in Java, JavaScript, and C++. Skilled in writing clean, well-documented code, collaborating with cross-functional teams, and debugging to deliver reliable, efficient software.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), C++
Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, Prisma (SQL & NoSQL data modeling)
Tools & Platforms: Git, GitHub, Postman, RESTful APIs, Docker, VS Code

EXPERIENCE

CloudCredits Technologies Pvt. Ltd. Jaipur, Rajasthan, India
Frontend Developer Intern Jun 2025 – Sep 2025

- **Collaborated with cross-functional team members** to design, develop, and maintain responsive interfaces using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and full mobile responsiveness.
- **Wrote clean, well-documented code** to integrate RESTful APIs for seamless frontend-backend communication, debugging and resolving issues that boosted data retrieval efficiency by 25%.

TECHNICAL PROJECTS

StackMind – Full-Stack Conversational AI Platform | [GitHub](#) | [Live](#)
MongoDB, Express.js, React.js, Node.js, Google Gemini 2.5 Flash API, RESTful APIs, Tailwind CSS

- **Designed and built a MERN AI platform**, integrating the Gemini 2.5 Flash API for async data streams and an optimized MongoDB thread architecture ensuring isolated session persistence at $O(1)$ query efficiency.
- **Developed and tested a React streaming engine** featuring a custom 40ms word-by-word animation loop, debugging and eliminating front-end rendering bottlenecks during complex state updates.

ResQ-AI: Disaster Intelligence & Response Platform | [GitHub](#) *Hackathon*
Next.js, Node.js, Prisma, PostgreSQL, WebSockets, Google Teachable Machine | **Role: Team Lead & AI/ML**

- **Led and collaborated with a hackathon team** to build a full-stack disaster platform, integrating WebSockets for real-time tracking across operational live dashboards.
- **Tested and deployed computer vision models** trained via Google Teachable Machine into the production web app for automated, live-streamed scene analysis and decision support.

WanderLust – Hotel Listing Platform | [GitHub](#)
MongoDB, Express.js, Node.js, EJS, JWT

- **Built a full-stack web app** with role-based JWT authentication and robust RESTful APIs to manage complex property and user authorization workflows.
- **Developed and tested an EJS responsive UI** featuring image uploads and a review system with strict server-side data validation to ensure database integrity.

EDUCATION

Jagannath University, Jaipur Jaipur, Rajasthan, India
Bachelor of Technology, Computer Science and Engineering 2023 – 2027

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Academic Performance: SGPA (Semester V): 7.23/10

ACHIEVEMENTS & CERTIFICATIONS

- **2x Smart India Hackathon (SIH) Internal Round Winner:** Collaborated with cross-functional teams to prototype innovative solutions addressing real-world challenges.
- **MERN Stack Web Development Certification:** Comprehensive full-stack training in MongoDB, Express.js, React.js, and Node.js.
- **Google 5-Day AI Agents Intensive:** Completed training in AI agents, prompt engineering, and agentic workflows.
